Zimperium zSecure

Mobile Threat Defense for Residents Data Sheet

Zimperium zSecure provides residents peace of mind. Give them free access to persistent, on-device protection for their mobile devices with the same technology used by top Fortune 100 companies and government agencies around the world. zSecure is an advanced mobile threat defense solution for residents that provides persistent, on-device protection to Android and iOS-powered mobile devices. Leveraging advanced machine learning, Zimperium zSecure detects threats across the complete mobile ecosystem and keeps residents safe while they're using their mobile device for everyday activities.

Enhanced by Artificial Intelligence – Stay Ahead of Threats

Zimperium zSecure's on-device, machine learning-powered detection scales with the threats, securing your resident's mobile devices against even the most advanced threats.

Privacy-First Approach to Mobile Device Security

With a privacy-first approach to security, Zimperium's advanced mobile endpoint security solution provides mobile security without sacrificing personal information from residents.

Integrate Seamlessly and Respond with Accuracy

Zimperium zSecure provides contextual alerts and meaningful recommendations to help keep residents safe and build good mobile security habits. Keep your residents ahead of the latest mobile threats without negatively impacting their mobile device use.

PRODUCT OUTCOMES

Protection Against Phishing
Protects residents from malicious text and e-mail messages

Connectivity
Keeps residents safe when connecting to public and open networks to work or bank

Device Safety
Informs residents if the settings on their devices are increasing risk

Device Compromise
Tells residents if their phone has been compromised and how to recover from it

Advanced App Analysis
Zimperium z3A™ understands any app's risk to a resident's privacy

App Safety -Android- on demand scans
Enables any time application scanning to ensure resident safety

Cross OS Support
Provides complete security coverage across Android and iOS

Privacy-Focused Security
No personal information or data is collected to keep mobile devices secure

Mobile Device Requirements

Apple iOS

Version Support iOS 12 or higher

Android

Version support Android 6 or higher

About Zimperium

Zimperium is the world leader in mobile security for iOS, Android, and ChromeOS. Zimperium solutions, including Mobile Threat Defense (MTD) and Mobile Application Protection Suite (MAPS), offer comprehensive mobile security for enterprises. MTD is a privacy-first application that provides mobile risk assessments, insights into application vulnerabilities, and robust threat protection. It is used to secure both corporate-owned and bring-your-own devices (BYOD) against advanced mobile threats across device, network, phishing, app risks, and malware vectors. MAPS delivers automated security testing and in-app protection to safeguard applications from attacks and ensure data integrity. Together, these solutions empower security teams to effectively manage and mitigate mobile threats.
