

Complete Mobile Security:

Zimperium Mobile Threat Defense for Zebra Devices

Zebra's devices are widely used today by industries all over the world to conduct business - retailers, manufacturers, healthcare providers, and many other industries rely on their technology on a daily basis. With that degree of global market penetration and the number of modern mobile endpoints involved in fulfilling those requirements, the challenge becomes determining how to secure them properly. Zebra determined that they required a solution that goes beyond securing the mobile phones and laptops used in today's workforce. Zimperium Mobile Threat Defense (MTD) is the only on-device solution that protects this global fleet of devices from device, network, malicious applications, phishing, and mobile malware attacks.

In the last three years, there has been a dramatic increase in the number of zero-day vulnerabilities targeted at mobile devices, making it a more significant challenge than ever before.

As a Zebra Alliance Partner, Zimperium is recognized for being a comprehensive mobile security solution that delivers sophisticated threat protection for mobile devices against known and unknown threats. Together, Zebra and Zimperium Mobile Threat Defense (zIPS) bring enterprise-grade technology that protects millions of devices against the most advanced, persistent mobile threats.

Key Benefits:

- **Powered by Machine Learning:** On-device, machine learning-based detections protect against the latest mobile threats, including zero-day malware.
- **Deploy Anywhere:** Integrates seamlessly with top MDM providers.
- **Critical Data Where You Need It:** With integrations into enterprise SIEM, IAM, UEM, and XDR platforms, security teams always have the data needed to improve security operations.
- **Zero-Touch Deployment:** Deploy on your Zebra devices without complicated activation steps.
- **Complete Mobile Device Coverage:** Deploys on a wide selection of Zebra devices including all Android, iOS, and Chrome operating systems.

Partnering with Zimperium allows you to create growth, differentiation, and profitability for your business. Create the best solution to secure Zebra devices by adding a modern MTD solution to your product and service offerings.

Extend the basic Mobile Device Management (MDM) policies of locking down a Zebra device, while leveraging the MDM to simplify the deployment of MTD, significantly reducing the risk of attack on your Zebra mobile devices.
