

Zimperium Mobile Threat Defense (MTD)

Zero-Touch Activation for Enterprises

Zimperium Mobile Threat Defense (MTD) - formerly known as zIPS - Easy Onboarding provides enterprises with an effortless and hassle-free zero-touch activation. By functioning directly with your Mobile Device Management (MDM) and Unified Endpoint Management (UEM) tools, the Zimperium MTD Easy Onboarding feature allows your security team to automate the configuration and deployment of the Zimperium MTD mobile application throughout your entire enterprise with minimal user interaction.

Mobile security deployment across an enterprise's workforce presents multiple challenges for security teams. When users require additional assistance due to their lack of technical skills or lack of time, the deployment rate is slowed down significantly. This can lead to multiple devices being vulnerable to mobile attacks.

Depending on the size of your enterprise, slow deployment poses additional costs to produce enablement and training, in addition to diverting resources to ensure security is installed on each mobile device.

Zimperium MTD Easy Onboarding enables administrators to achieve a higher deployment rate without relying solely on the employee to install the application, immediately improving your return on investment. Protect your employees with little to no interaction against all four threat categories — device compromises, network attacks, phishing and content, and malicious apps.

Benefits

Cross-OS Support

Supports Android and iOS mobile devices.

Uncomplicated Configuration

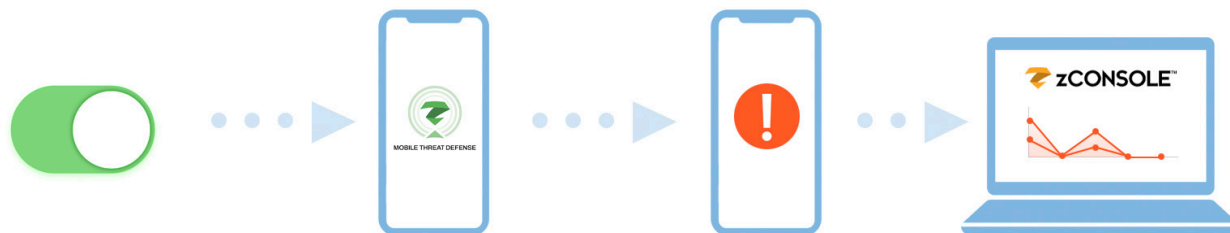

Uses standard features available by UEM/MDM and Zimperium MTD.

Minimal User Interaction

Little to no user action is required.

Complete Protection

Immediate threat protection across devices, networks, apps, phishing, and the web.

Configure your MDM to auto-grant all permissions

Send Zimperium MTD to device

Provide automatic device protection and alerts with no interaction

Review threats reported to zConsole

With MTD Easy Onboarding, zero-touch activation is just a few steps away. [Contact us](#) for a demo today.
