

# Zimperium Corporate Fact Sheet

2025

# Company Snapshot

Zimperium is the world leader in mobile security, purpose-built to protect the modern mobile enterprise. Trusted by leading organizations and governments, our AI-driven platform delivers real-time, on-device protection for mobile applications and devices—safeguarding sensitive data, internal operations, and customer experiences.

As cybercriminals adopt a mobile-first attack strategy, Zimperium helps organizations stay ahead with proactive defense against evolving threats—including mobile-targeted phishing (mishing), malware, app vulnerabilities, and zero-day exploits. Our mission is to empower organizations to operate securely and confidently in today's dynamic digital environment.

<b>Industry</b>	<b>Mobile Threat Defense and Mobile Application Security</b>
<b>Founded</b>	<b>2010</b>
<b>CEO</b>	<b>Shridhar Mittal</b>
<b>Headquarters</b>	<b>Dallas, TX</b>

<b>Analyst Coverage</b>	<b>Zimperium is a Mobile Threat Defense and Mobile App Security leader according to all major analyst firms including Gartner, IDC, Forrester, Frost &amp; Sullivan, GigaOm, QKS Group</b>

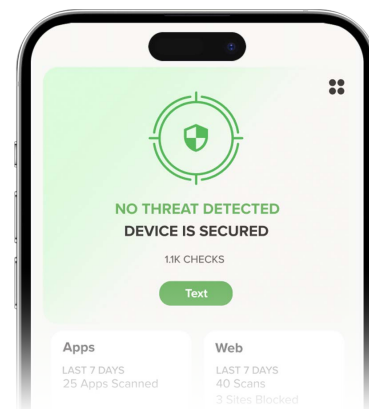

# Solutions

Our solutions include Zimperium Mobile Threat Defense (MTD), which runs locally on any mobile device and detects cyberattacks without a connection to the cloud and our first-of-its-kind Mobile Application Protection Suite (MAPS), a comprehensive solution that helps organizations protect their mobile apps from development to running in the wild on end user devices.

Zimperium MTD provides persistent, on-device protection for mobile devices similar to what next generation endpoint protection platform (EPP) solutions do for traditional endpoints. To help organizations assess the security and privacy risks of installed apps, Zimperium MTD also includes our advanced app analysis scanning engine.

Zimperium's Mobile Application Protection Suite (MAPS) helps enterprises build safe and secure mobile apps resistant to attacks. It is the only unified platform that combines comprehensive in-app protection with centralized threat visibility. The platform provides app shielding, key protection, app scanning, and runtime protection capabilities. In addition, a threat management dashboard provides real-time threat visibility and the ability to respond to emerging threats instantly without an app update.

# Zimperium: Unmatched Mobile Security

With innovative solutions spanning both Mobile Threat Defense and Mobile Application Protection, Zimperium protects more enterprises than any other provider. Here's why organizations worldwide choose Zimperium:

- Delivers on-device protection against known and unknown device, network, mishing (mobile phishing), and malicious app attacks
- Secures Android, iOS, and Chromebook environments
- Manages securely on any cloud or fully on-premises
- Provides Mobile Threat Defense solutions with FedRAMP "Authority to Operate" certification
- Integrates with multiple UEMs within a single tenant
- Ensures privacy by keeping all PII data securely on the device
- Protects mobile apps from development through deployment in live environments

## Strategic Partnerships

Zimperium has an unmatched ecosystem of strategic partnerships that enable us to protect more enterprises and users with our leading technologies:

### XDR / SIEM

### OEM PARTNERSHIPS

### IDENTITY & ACCESS MANAGEMENT (IAM)

### ENTERPRISE MOBILITY MANAGEMENT (EMM)

### CLOUD PARTNERS
